- **Hosting & Domains:** cPanel, SPanel, Linux/Ubuntu, DNS records, domain management, SSL, Cloudflare.
- **Security & Support:** malware investigation and removal, Wordfence, server hardening, PHP error troubleshooting, resource and CPU investigations.
- **Frontend & AI:** HTML, CSS, JavaScript, React, Next.js, Vite, Tailwind CSS, Git/GitHub, AI-assisted development.

PROFESSIONAL EXPERIENCE

WordPress Developer & Linux Server Administrator

Zeetech (Pvt.) Ltd, Lahore, Pakistan | Oct 2023 - Present

- Build and maintain WordPress sites for trading, AI education and health clients across the UAE and Europe.
- Administer Linux servers via SSH, investigate PHP and Apache error logs and resolve live production incidents.
- Remove malware and code injection, then restore and harden server security.
- Manage DNS records, SSL installs and renewals, cPanel hosting and uptime monitoring.

WordPress Developer & Server Manager

Freelance, Remote, Pakistan | 2022 - Present

- Deliver complete WordPress builds for clients in Switzerland, the USA and Pakistan.
- Manage hosting independently, covering SSH, cPanel, DNS, SSL and post-launch maintenance.
- Resolve live emergencies including code injection, DNS failures and downtime recovery.

WordPress Developer

Enfotrix (Pvt.) Ltd, Sargodha, Pakistan | Sep 2021 - Sep 2023

- Built 10+ WordPress websites across eCommerce, health and creative industries.
- Developed WooCommerce stores with payment gateway integration.
- Improved Google PageSpeed scores to 90-100 through server-side optimisation and caching.

SELECTED PROJECTS

- Zephgain: pre-rendered React site for an AI trading platform, with per-route SEO and structured data.
- AI Pro App: multi-page React build for an AI crypto research platform, with static pre-rendering.
- TraderAI: React and Vite trading dashboard shipped to production on Render.

EDUCATION & CERTIFICATION

- BS Computer Science (BSCS), completed 2022.
- DevOps Certificate, covering Linux, Git and deployment workflows.
