Rank Math SEO • Website Migrations • Backups • Technical SEO Basics • Website Monitoring • QA & Troubleshooting

AI / Automation
AI-Assisted Development • AI Website Interfaces • AI Trading Interface Development • Website Monitoring Automation • Workflow Automation • AI-Based Productivity Solutions

PROFESSIONAL EXPERIENCE

WordPress Developer & Linux Server Administrator

Oct 2023 - Present
Zeetech (Pvt.) Ltd - Lahore, Pakistan

Developing and operating WordPress platforms for financial trading, AI education and health clients across the UAE and Europe.

- Designed and developed WordPress websites for financial trading, AI education and health platforms serving UAE and European clients
- Administered Linux web servers via SSH - file management, permissions and command-line troubleshooting
- Monitored and resolved Apache/Nginx/PHP error logs on live production sites
- Detected, isolated and removed malware and code injection attacks; restored and hardened server security
- Managed DNS records (A, CNAME, MX, TXT), domain routing, email setup and propagation troubleshooting
- Configured firewall rules and IP blocking/unblocking against DDoS and brute-force attacks
- Administered MySQL databases via terminal - queries, table repair, backup and restoration
- Managed the full hosting lifecycle: cPanel, domains, SSL/TLS install and renewal, uptime monitoring

Freelance WordPress Developer & Server Manager

2022 - Present
Self-Employed - Remote · Pakistan

Delivering complete WordPress builds and managing hosting and server infrastructure for clients in Switzerland, the USA and Pakistan.

- Delivered complete WordPress websites for clients in Switzerland, the USA and Pakistan

- Managed server environments independently - SSH, cPanel, DNS, SSL and post-launch maintenance
- Resolved live emergencies - code injection, DNS failures, SSL expiry and downtime recovery
- Communicated technical work clearly with clients, hosting providers and team members

WordPress Developer

Sep 2021 - Sep 2023

Enfotrix (Pvt.) Ltd - Sargodha, Pakistan

Built and maintained WordPress and WooCommerce websites across eCommerce, health and creative industries.

- Built 10+ WordPress websites across eCommerce, health and creative industries
- Achieved 90-100 Google PageSpeed scores through server-side optimization and caching
- Developed WooCommerce stores with payment gateway integration
- Provided ongoing maintenance, server support and client technical assistance

SELECTED PROJECTS

AI Trading / TraderAI

Built the application end to end and shipped it to production: React routing, responsive dashboards, AI assistant interface, chart analysis UI, custom-domain configuration and performance / caching optimization.

Zephgain

Built and shipped the front end: clean-path routing with legacy redirects, a pre-render pipeline that renders every route to static HTML, per-route SEO with Organization, Service and FAQPage structured data, a validated registration form, and a real 404 page served as a 404 rather than a soft fallback.

AI Pro App

Built the interface and the build setup end to end: clean-URL routing across 10 static entry points with 308 redirects from the legacy .html links, a post-build step that inlines CSS to remove render-blocking stylesheet requests, an accessible single-open FAQ accordion, legal modals for Privacy, Terms and Risk Disclosure, and a registration form with inline validation and a loading state.

Production WordPress & Hosting Troubleshooting

Resolved critical WordPress errors, PHP configuration and limit issues, plugin conflicts, SSL problems, DNS/SERVFAIL issues, PHP-FPM/resource problems and Cloudflare configuration - plus website migrations and hosting-provider support escalation.

EDUCATION & PROFESSIONAL DEVELOPMENT

- BS Computer Science (BSCS) - completed 2022
- DevOps Certificate - practical learning in deployment, Linux, servers, Git and DevOps workflows
- Currently developing skills in DevOps, cloud deployment, AI-assisted development and automation

LANGUAGES

English - Professional • Urdu - Native

CAREER FOCUS

Interested in roles combining web development, WordPress engineering, hosting/server administration, DevOps and AI automation. Strongest value comes from practical production troubleshooting and the ability to manage a website from development through hosting, DNS, SSL, security and deployment.
