- **Hosting & Domains:** cPanel, SPanel, Linux/Ubuntu, DNS records, domain management, SSL, Cloudflare.
- **Security & Support:** malware investigation and removal, Wordfence, server hardening, PHP error troubleshooting, resource and CPU investigations, website monitoring.
- **Frontend & AI:** HTML, CSS, JavaScript, React, Next.js, Vite, Tailwind CSS, Git/GitHub, AI-assisted development with Claude.

PROFESSIONAL EXPERIENCE

WordPress Developer & Linux Server Administrator

Zeetech (Pvt.) Ltd, Lahore, Pakistan | Oct 2023 - Present

- Build and maintain WordPress and WooCommerce sites for trading, AI education and health clients across the UAE and Europe.
- Administer Linux servers via SSH, investigate PHP and Apache error logs and resolve live production incidents.
- Remove malware and code injection, then restore and harden server security.
- Manage DNS records, SSL installs and renewals, cPanel hosting and uptime monitoring.

WordPress Developer & Server Manager (Part-time, Remote)

Freelance, Remote, Pakistan | 2022 - Present

- Deliver complete WordPress builds for clients in Switzerland, the USA and Pakistan, alongside full-time roles.
- Manage hosting independently, covering SSH, cPanel, DNS, SSL and post-launch maintenance.
- Resolve live emergencies including code injection, DNS failures and downtime recovery.

WordPress Developer

Enfotrix (Pvt.) Ltd, Sargodha, Pakistan | Sep 2021 - Sep 2023

- Built 10+ WordPress websites across eCommerce, health and creative industries.
- Developed WooCommerce stores with payment gateway integration.
- Provided ongoing maintenance, server support and client technical assistance.
